

# POOL COVERS

## Preserve the Heat of Your Pool, Respect Our Planet.

For over four decades, we've been dedicated to designing and developing eco-friendly solutions. With our insulating pool covers, you can save over 50% on your energy costs. Additionally, an Inducon cover minimizes water and chemical evaporation, an investment that pays for itself within a few years.

We have the necessary experience. As a result, we've perfected our covers, making them effortlessly last 15 to 20 years. Add regular maintenance to this, and you have the perfect combination. In addition to our patented folding louver covers, we also offer rolling louver and foil covers. Whether you have an indoor or outdoor pool, our covers are custom-made.

Pressing a button to fully cover your pool is not a luxury, especially during frequent use. This is why user-friendliness, along with safety and reliability, is of utmost importance to us.

Safety, reliability, and ease of use are important, but aesthetics also matter. For instance, our louver rolling cover can be fully integrated into the pool floor. We can also design the housing for a foil or folding louver cover to your specifications.

# FLUID TECHNOLOGY FLUID PASSION

## ROBUST

Our products are built to last.  
Sometimes for a lifetime!

# 1978

For over 40 years, a well-known name in the world of movable floors and covers.

## CRAFTSMANSHIP

Our craftsmanship is based on years of experience combined with new techniques and insights.

# 1.500+

Over 1,500 unique installations, many of which are still in operation.

## CUSTOM SOLUTIONS

No two pools are the same. That's why we work closely with our clients to find the best, tailor-made solution.

inducon.

## Internationally Active

Our solutions are unique and often groundbreaking. Clients from Norway to New Zealand trust our down-to-earth expertise from Drenthe. They experience our flexibility in service and our passion for our work. Hence, Inducon, fluid technology, fluid passion!

# FOIL COVER

## Lightweight and Highly Versatile

Foil covers, a dynamic choice for both indoor and outdoor pools, offer limitless possibilities in terms of shapes and sizes. These covers are rolled on and off around a central axis, making them available in various configurations.

Whether it's mounted on the ceiling, placed on poles, subtly integrated into a bench, or even made mobile, the possibilities with a foil cover are endless. Regarding the foil itself, we offer two variants: standard foil and the premium segment, copolymer foil. The copolymer variant represents the highest quality. Unlike louver covers, the foil doesn't roll fully automatically, but even here, minimal effort is required.

## Why Inducon?

- Energy savings of 50%
- Return on investment in 5 to 10 years
- Robust; a sturdy, durable construction
- Suitable for both indoor and outdoor pools
- Works in all weather conditions
- Average lifespan of 20 years
- Custom-designed and made
- Available for existing pools

# SLATS ROLLING COVER

## From Unnoticed to Perfectly Covered in an Instant

Within the realm of covers, the slats rolling cover stands out as the most flexible choice. This versatile cover can be positioned in various ways: along the sides, on top of the pool surface, or even embedded in the pool. Even the most unique contours of your pool can be effortlessly incorporated into the slats rolling cover, ensuring optimal insulation.

## Discover the Versatility of the Slats Rolling Cover

With our slats rolling covers, many possibilities are on the table, as evidenced by their countless applications. The cover can be placed on the pool edge as a static or mobile option, with a winding axis that can also be mounted above the pool using a solid structure on poles. Additionally, the cover is often seamlessly integrated into a special shaft in the pool floor, with a sealable lid for added discretion and convenience. This way, it can also serve as a complement to a movable floor, covering the entire pool with a single movement.

# SLATS FOLDING COVER

## Our Workhorses: the Revolutionary Slats Folding Covers

We're proud of the patented slats folding cover, a workhorse in our collection. It's specially designed to effortlessly cover large pools. With a simple press of a button, this technological marvel transforms an expansive pool from swim-ready to fully insulated.

As the name suggests, the slats fold into a shaft behind the pool, which means there's virtually no limit to the length of the cover. The cover is created using sturdy PVC slats with airtight chambers, providing both buoyancy and insulation.

The shaft is usually partially embedded in the deck and can be dressed up as desired. With minimal adjustments, the deck can become walkable or even feature starting blocks.
