

Equal Collaboration as the Foundation

We believe collaborations are successful when all parties operate as equals, bringing their own expertise. It's about listening to each other and jointly seeking the best, open, and transparent solution. Together, we become convinced of the function and added value of the installation.

Partner from Design to Maintenance

Throughout the entire process—before, during, and after implementation—we involve and support the customer. This way, there are no surprises, and the best sustainable solution is found, from design to maintenance.

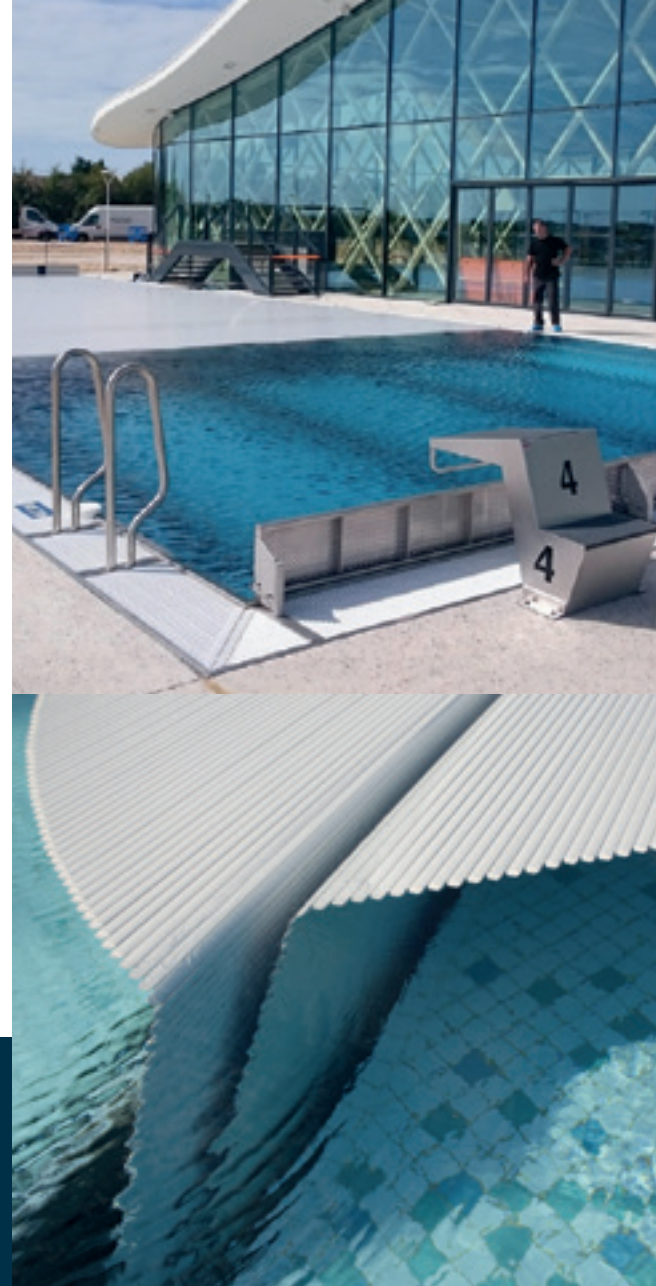

We Value Our Customers

Clarity and honesty, along with expert, independent advice, go hand in hand, from the initial design plans to expectations regarding lifespan and performance. Our care for the customer doesn't end at the project's completion.

Every Detail Has Been Thought Of

An installation is fully developed in our design system, but it comes to life through intensive field collaboration. We love to create beautiful products together.

Experiences of all involved parties and colleagues are translated into improving existing products and developing new ones.

FLUID TECHNOLOGY FLUID PASSION

1978

For over 40 years, a well-known name in the world of movable floors and covers.

1.500+

Over 1,500 unique installations, many of which are still in operation.

ROBUST

Our products are built to last. Sometimes for a lifetime!

CRAFTSMANSHIP

Our craftsmanship is based on years of experience combined with new techniques and insights.

CUSTOM SOLUTIONS

No two pools are the same. That's why we work closely with our clients to find the best, tailor-made solution.

Internationally Active

Our solutions are unique and often groundbreaking. Clients from Norway to New Zealand trust our down-to-earth expertise from Drenthe. They experience our flexibility in service and our passion for our work. Hence, Inducon, fluid technology, fluid passion!

fluid technology, fluid passion.

SPECIALIST IN MOVABLE FLOORS AND COVERS

OUR STORY AND OUR MISSION.

Since 1978, Inducon has been active in the swimming pool world. We once started with just four people in an old dairy factory and over the years have grown into a reliable partner in high-tech swimming pool technology.

We design, create, install, and maintain the installation that is most suitable for our customers. With a well-thought-out design and solid support, a lifespan of over 30 years is not uncommon. We are proud of all our installations, most of which are still in operation. The oldest has been in operation for over forty years.

This craftsmanship doesn't happen on its own. We constantly invest in knowledge and education. We embrace new technologies and combine them with the knowledge and experience of colleagues who have worked with us for many years.

Through all of this, we have grown from Beilen, a beautiful town in northern Netherlands, into a company that operates internationally. The most diverse clients from various countries experience our innovation and feel the passion we have for our work and the attention we give to our customers. Or, as our international theme says:

'Inducon, fluid technology, fluid passion'
