

MOVING FLOORS

Enhance Your Swimming Experience

Our technology enables seamless adjustment of your pool's depth for optimal comfort, fun, and versatility for every user group.

Always the Ideal Water Depth

We tailor your pool floor to your preferences, with slopes, integrated steps, and adjustable sections. Our moving floor can be installed with minimal depth, ensuring that sufficient pool depth is maintained even in existing pools. Safety, ease of use, and water hygiene are guaranteed.

Reliable Drive System

The floor moves smoothly thanks to a reliable chain drive system powered by electromotors under the

deck. This system, free from protruding moving or mechanical parts above the pool edge, requires minimal structural modifications. Furthermore, the pool floor remains free of wiring and mechanics.

Energy-Efficient

In the raised position, the moving floor acts as a cover, resulting in significant savings on pool energy costs. Additionally, it reduces pool water and chemical evaporation, leading to reduced condensation and corrosion.

FLUID TECHNOLOGY FLUID PASSION

1978

For over 40 years, a well-known name in the world of movable floors and covers.

1.500+

Over 1,500 unique installations, many of which are still in operation.

ROBUST

Our products are built to last. Sometimes for a lifetime!

CRAFTSMANSHIP

WHY AN INDUCON FLOOR?

Imagine a pool that adapts to your desires, where the depth is flexible and the possibilities are endless. This is precisely what we offer with our state-of-the-art pool floors!

Do you want a fixed depth, or perhaps a sloping depth for that extra diving pleasure? With our pool floors, it's possible! These floors effortlessly adapt to any desired water depth. But that's not all.

Our floors don't just serve as pool bottoms; they also act as insulating covers when raised. This means you not only have control over the depth but also over the energy efficiency of your pool. This is due to the advanced design that guarantees high load capacity and stability.

And let's talk about style!

We understand that your pool should reflect your taste. Therefore, a wide range of finishing options is available, including plastic, tiles, or natural stone. The choice is yours!

Rest assured, these advanced floors are exceptionally easy to operate. With just a few simple actions, you can adjust the depth or cover your pool, all with minimal structural adjustments.

We go beyond providing options. We understand that every pool is unique. That's why there are numerous possibilities to ensure that our solution fits perfectly. Additionally, our floors are available for existing pools.

'Inducon, fluid technology, fluid passion'

Team Inducon

PUBLIC POOLS

We believe in the versatility of water fun, from the little ones splashing around to those taking swimming lessons and everything in between!

Our floors are designed to adapt to your needs. With fully automatic height adjustments, both horizontally and sloping, Inducon offers a unique experience.

In their highest position, the floors transform your pool into a sturdy platform with insulating properties, making your pool multifunctional and energy-efficient.

The public sector demands user-friendly, robust, and, above all, safe solutions. At Inducon, we understand these needs like no other. Every project is tailored, not only to your preferences but also to the specific situation. This ensures that our installations fit perfectly, whether it's a new or an existing pool. The possibilities are endless.

Think about wheelchair lifts, tilting, or integrated stairs. Even when the floor covers only half the pool, we provide a smart solution with a moving flap. We go beyond standard solutions; we create a tailored pool experience for everyone.

PRIVATE POOLS

We've often witnessed the magic of transformation. Turn your pool into a terrace or your dance floor into a pool.

Our moving floors bring this transformation to life with a single press of a button, where aesthetics and functionality meet. We understand that you're looking for an efficient solution that seamlessly aligns with your desires and situation.

At Inducon, we offer customized solutions for every pool, regardless of size, location, or situation. Whether it's an integrated staircase or a terrace, our floors adapt to your needs.

The floors have significant load capacity and can even carry heavy materials like natural stone. The surface is strong enough to serve as a terrace or dance floor. In the highest position, the floor forms a perfect plane with the stairs and the surrounding deck, immediately creating an insulating and covering effect for the pool, ensuring complete child safety.
